Q1. Read the Comprehension passage and answer the questions that follow:-

The first light house was built on the order of the king of Egypt. He wanted it to be the first, the biggest and the best lighthouse in the world. A large square building was built .In this they put up the lighthouse tower. When the tower was completed, it stood over 150 meters high. It had eight sides and was built of white marble. At the top of this great tower was the lantern of the lighthouse. And on top of the lantern was placed a huge bronze statue of the sun god. Wood for the fire was carried to the top by means of a lift which worked by water power—an invention of the clever Egyptians. But the most brilliant idea of all was the way they used a big mirror to reflect the light from the fire out across the sea. It was said that the light could be seen for forty-five kilometers. Egypt's lighthouse became known all over the ancient world and was considered one of the Seven Wonders of the World. It stood for almost 1500 years, until it was destroyed by an earthquake. Sadly, little is left of this magnificent building today!
