

# DELHI PUBLIC SCHOOL JAMMU

Session -2024-2025

Month: October Assignment

Subject: English

Class: V

**Q1. Read the passage carefully and answer the questions given below:-**

When you walk on a sandy beach, you leave your footprints behind you. The waves of the sea come and wash them away. When you walk in the desert, you leave your footprints behind you. The wind soon blows your footprints away. But, if you leave your footprints on the moon, they will stay there forever. The moon has no air or water and so, no wind. The footprints of the first people on the moon are still there today. The moon is the Earth's largest natural satellite. The moon is about a quarter the size of the earth. On 20 July, 1969, Neil Armstrong and Buzz Aldrin were the first two men who got off their spaceship and stepped on the moon. They started to walk. They were wearing heavy spacesuits but could walk and jump easily. This was because everything was lighter on the moon. Armstrong and Aldrin spent three hours on the moon, but their footprints remained there forever.

**A) Choose the appropriate answer.**

i) The footprints on a sandy beach are washed away by..... .

a) wind

b) waves

c) air

ii) The moon is the Earth's largest natural..... .
