- Q3. How is petroleum formed millions of years ago?How is it obtained from the Earth 's crust ?

Section – D

VI Read the paragraph and answer the following questions:,

Forests are often called the “lungs of the Earth” because they produce oxygen and absorb carbon dioxide. They provide food, shelter, and medicine for humans and animals. Many products we use daily, like paper, rubber, and spices, come from forests. Forests also attract rain, which helps in farming. Unfortunately, due to deforestation, many animals lose their homes, and the Earth’s temperature rises. If we do not protect our forests, future generations may suffer from a lack of fresh air and clean water.

Answer the following questions:-

Q.1 What are some useful products that come from forests?

Q.2. What happens to animals when forests are destroyed?

Q.3. Why are forests called the "lungs of the Earth"?

Q.4. Why should we protect forests for future generations?

VII Value Based Question:

Q.1 Why is it important to develop eco-friendly vehicles like electric cars?
