Q5. Which of the following is an example of a culture-fair test?

- a) Binet-Simon Test
- b) WISC
- c) Stanford-Binet
- d) Raven's Progressive Matrices

Q6.

Assertion (A): Intelligence is a single, general ability.

Reason (R): Gardner proposed the theory of multiple intelligences.

- a) Both A and R are true, and R is the correct explanation of A.
- b) Both A and R are true, but R is not the correct explanation of A.
- c) A is true but R is false.

d) A is false but R is true.

Q7.

Assertion (A): People with high EQ are better at handling social relationships.

Reason (R): Emotional intelligence involves awareness, control, and management of emotions.

- a) Both A and R are true, and R is the correct explanation of A.
- b) Both A and R are true, but R is not the correct explanation of A.
- c) A is true but R is false.
- d) A is false but R is true.

### **Q8. Case-Based Question**

Case:

Nisha is a student who excels in art and music. She often comes up with unique ideas and expresses them creatively. However, she finds solving numerical and logical problems challenging. Her teachers praise her for being sensitive to the emotions of others and for resolving group conflicts peacefully.

Q8.1. Which types of intelligence are strong in Nisha according to Gardner's theory?

Q8.2. Identify two qualities in the case that reflect emotional intelligence.

Q9. Discuss the major types of intelligence proposed by Howard Gardner. Explain any four intelligences with examples.

Q10. Explain the concept of creativity. Discuss its characteristics and the methods of enhancing creativity among children.
