26. Write three adaptations in ducks that help it to survive in aquatic habitat.

LONG ANSWER TYPE QUESTIONS:

27. Discuss the importance of roughage in our diet.
28. With the help of examples, explain the expansion and contraction in liquid and gases.
29. What is habitat? Discuss in detail about tropical rainforest habitat.
30. What is rain water harvesting? What are the two ways in which it can be done?
31. Describe in detail the adaptation in Yak.
32. Define deficiency diseases. Discuss any three deficiency diseases caused by deficiency of vitamin and minerals.

MULTIPLE CHOICE QUESTIONS

33. Iron is
- a. Mineral
 - b. fat
 - c. vitamin
 - d. protein
34. Carbon dioxide is used by plants to
- a. Breathe
 - b. make food
 - c. remove waste
 - d. trap energy of sun for photosynthesis
35. Water table refers to
- a. Level of ground water
 - b. level of surface water
 - c. level of sea water
 - d. none of these.
36. Seasonal movement of animals to a favourable environment is called
- a. Camouflage
 - b. Hibernation
 - c. Migration
 - d. None of these
37. A food item turns blue black when iodine is added to it. It confirms the presence of
- a. proteins
 - b. fats
 - c. starch
 - d. water
38. Water spilled on a floor dries up due to
- a. melting
 - b. freezing
 - c. evaporation
 - d. condensation
39. Circle the odd one
- a. Iron, calcium, protein, iodine
 - b. Scurvy, rickets, tissue, night blindness
 - c. Anaemia, goitre, tooth decay, beri beri
 - d. none of these
40. _____ have stream lined body
- a. earth worms
 - b. tiger
 - c. fish
 - d. yak
41. Marasmus is caused due to diet insufficient in
- a. proteins
 - b. carbohydrates
 - c. fats
 - d. all of these
42. Hibernation is an adaptation for
- a. preventing loss of water
 - b. escaping hot weather
 - c. escaping cold weather
 - d. none of these
